BONALDO

Blend bed

Designer: Giuseppe Viganò

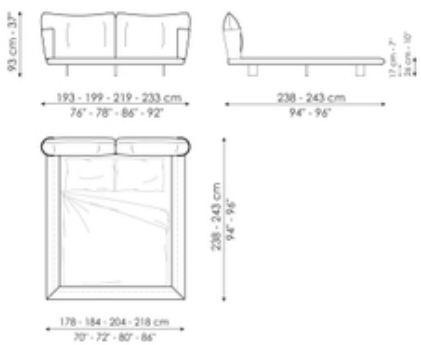

The modern Blend bed: a strong and distinctive item. A headboard that plays on the combined design of an emery leather section and the softness of the cushioning. The composition of the structure adds value to the upholstered section, creating a rigorous line that widens upwards from the bottom, merging with the welcoming padded headrest, consisting of two big cushions. The overall effect is of a solution characterised by an elegant image and gentle composition.
The emery leather section is an important aesthetic feature, a sort of frame that uses research into materials to create shapes that share a contemporary, elegant, dynamic, welcoming and soft feel.
