BONALDO

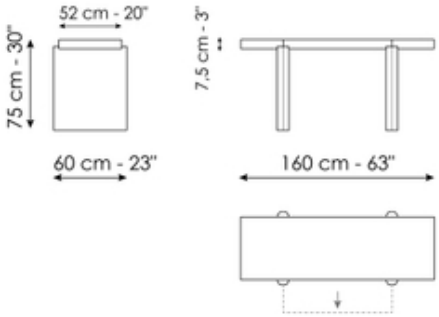

Blocco Desk

Designer: Alain Gilles

The Blocco collection, designed by Alain Gilles, is inspired by the idea of a large block of wood lifted and resting on two supports, almost like an archaeological artefact or a precious object to be highlighted and displayed.
The design stems from the contrast between two types of forms: on one side, a rigorous and minimal element defined by straight lines; on the other, softer yet substantial supports with rounded shapes. The legs, with their architectural presence, resemble pillars rather than simple supports.
Blocco desk appears as a strongly graphic and sculptural element, while remaining highly functional thanks to a hidden drawer that allows small items such as pens, notebooks, chargers, tablets or laptops to be stored discreetly. The drawer introduces a graphic detail that lightens the volume while preserving its monolithic appearance.
Blocco Desk, made of Canaletto walnut, is a versatile desk suitable for the whole family, whether for writing an email, studying or working from home.
