BONALDO

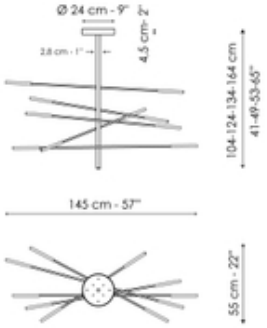

Crossroad

Crossroad is a sculptural design, created by Oriano Favaretto and notable for its end feature that leaves a strongly dynamic mark in a setting. Its basic element is a matt lead-colour painted metal cylinder which encloses the light source at both ends inside a sophisticated amber-coloured glass element. The interplay of light and the criss-crossing of the arms in a multitude of directions makes Crossroad a modern lamp capable of distinguishing settings, while thanks to its remarkable scenic impact, it represents a functional and decorative element able to create pleasant atmospheres and sensations.
The Crossroad collection consists of a suspension lamp and a floor lamp, making it possible to create interesting coordinated combinations.
