BONALDO

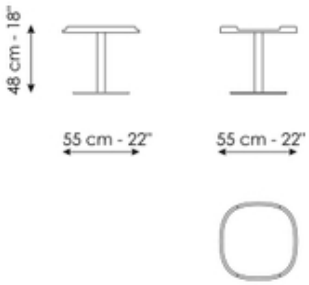

Gem

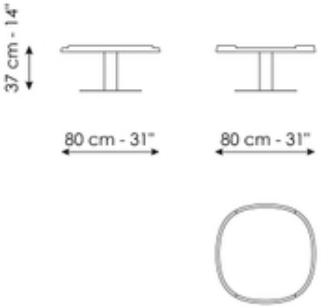

Designer: Marconato and Zappa

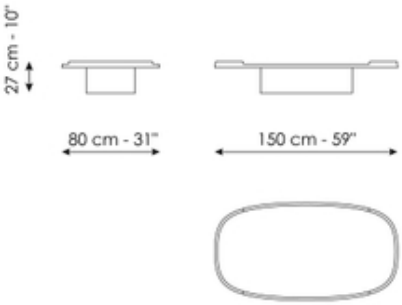

Gem is a family of coffee tables designed to create dynamic and versatile compositions: thanks to the variety of shapes, bases, sizes, heights, materials and finishes, Gem allows for ever-changing combinations.
The top, available in glass or ceramic in a wide range of options, is enhanced by a thin perimeter frame in glossy lacquered wood, a precise, discreet yet distinctive edge that emphasises the purity of the form and highlights the material. The metal structure further enhances the design through two different combinations with the top: the base in bronze finish is paired with a glossy lacquered wood edge in glossy brown, while the base in lead finish is combined with a glossy lacquered wood edge in glossy grey, creating refined and coherent pairings.
