BONALDO

Groove

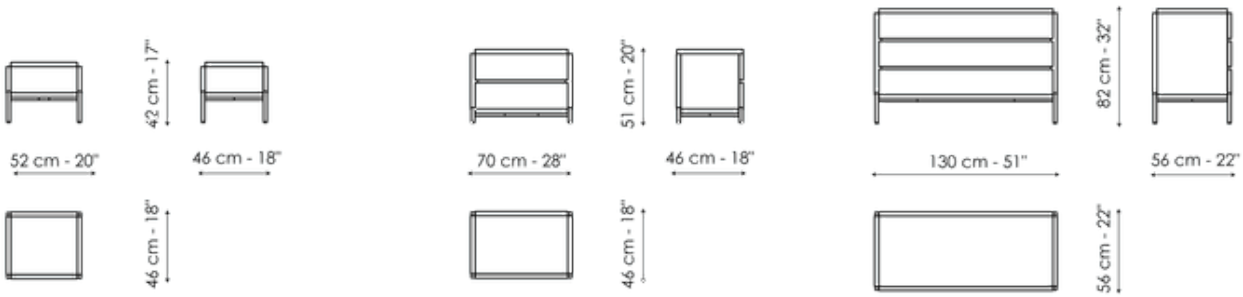

Designer: Mauro Lipparini

The elements of the system have been designed with a focus on the linear, graphic purity created by the wooden modules that form the drawers, sides and top, resting on a metal structure that serves as a base. The simple geometry of the bedside tables and dresser set emphasises their practical function: this is mainly the case with the grooves on the front section, which are particularly highlighted by the design and serve as handles without being visible.
