BONALDO

Keshi

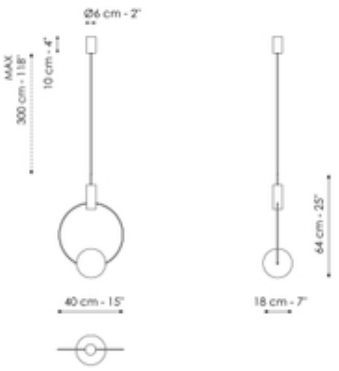

Keshi is a jewel that illuminates discreetly, creating an intimate and sophisticated atmosphere. A blown glass sphere, similar to a valuable pearl, hangs sinuously from its stem, creating an image of pure elegance. The essential and contemporary lines that define its silhouette capture attention and allow Keshi to fit into any environment, from residential to contract.
Keshi is available with a brushed nickel and copper bronze frame, two finishes that combine with the delicate brightness diffused by the transparent glass sphere. Further customization is possible with the 3-light version, while casual features a round rosette and the lights can be mounted at variable heights and linear features a rectangular rosette with rounded corners and the lights fixed at the same height and distance.

Data sheet

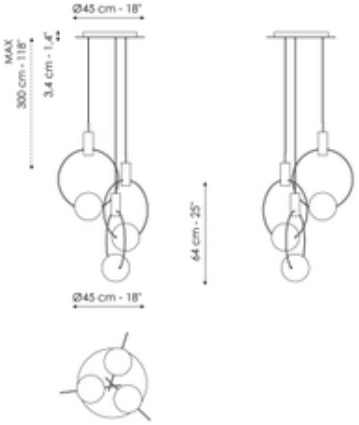

Keshi - 1 light

Width: 40cm

Depth: 18cm
