BONALDO

Obel

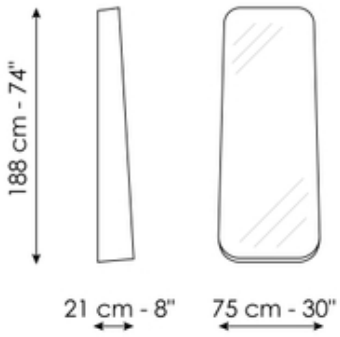

Designer: Roberto Paoli

Obel is an important standing frameless wall mirror that, thanks to its large reflective surface, allows the individual to play the starring role. The trapezoidal shape, consisting of a thin structure with blunt contours, has a wider thickness at the base and a narrower one at the top, giving movement to the whole. The wooden structure, which gives the vertical mirror volume and richness, is available in American walnut. Obel's conspicuous size, as well as the rounded and sinuous profile, ensures a spectacular result of great impact. Its pure and slender monolithic presence is able to expand and decorate any space with lightness and sophistication: this is when functionality is in perfect agreement with beauty.

Data sheet

Obel

Width: 75cm

Depth: 21cm

Height: 188cm

Finishes

Frame

Veneered wood

American walnut
