BONALDO

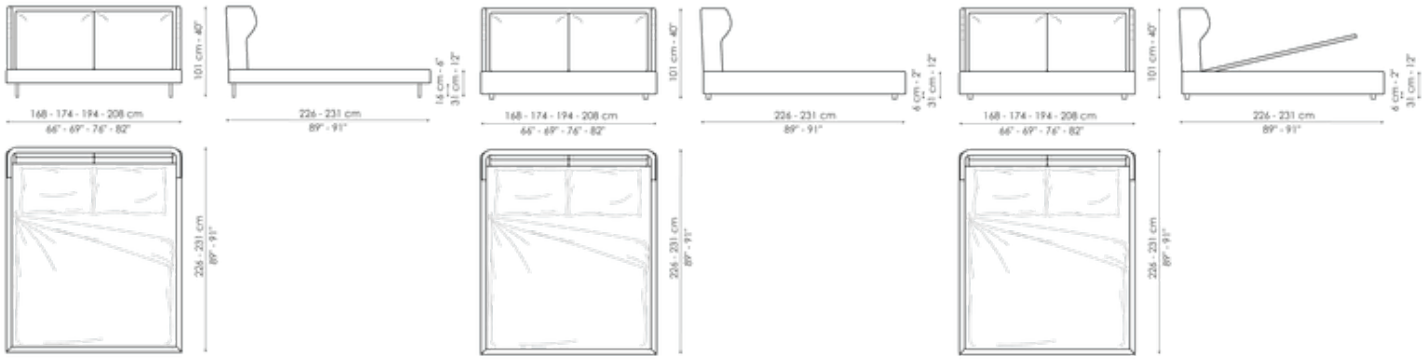

River

The headboard is the true visual focal point of the River double bed, soft and suggestive: the side “wings”, continuation of the front section, are a decorative element and quite cosy. It has great customisation potential, thanks to the choice of numerous fully removable covers available in fabric, leather or eco-leather. A contemporary bed which is perfectly at ease in environments with different aesthetic characteristics and which feels “at home” both in traditional furnishing solutions and when combined with contemporary design elements.
It is the details that characterise a piece of furniture such as the River modern bed: the elegant quality of the workmanship, the materials used and the range of finishes available. The aesthetic point of reference is harmony: the pleasing elegance of the ornamental lines of the headboard is matched by the sobriety of the bed frame and the lightness of the metal feet, available in different colours and finishes.
