BONALDO

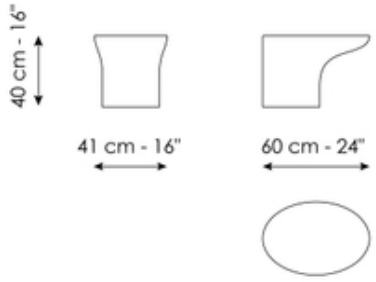

Sloan

Designer: Massimo Castagna

Sloan is a monolithic coffee table, conceived as an individual volume in which top and base merge seamlessly.
The oval top emerges from the base, compact and solid, creating a continuous form defined by a slight misalignment between the two elements.
The bevelled edge of the top follows this continuity, softening the profile and enhancing its fluidity.
The material in which Sloan is made reinforces its unified perception: high-density polyurethane with a concrete-effect finish, in the mineral white shade, features a visually textured surface marked by subtle variations that respond to light and enhance its presence. This finish brings Sloan closer to an architectural language, making the table appear as a small sculptural volume, almost like a scaled-down architectural element.
