Sofì

The primary shape of the Sofi collection, designed by Studio Team Design, is the borosilicate glass globe with a warm amber finish, which is combined with a burnished brass cylinder that contains the light source and brings to mind the image of master glass-blowers who, in their Venetian workshops, use their long blowpipes to craft the incandescent molten glass with great skill. The Sofi pendant design lamp makes it possible to create coordinated environments, thanks to its availability in a wide range of models: the ceiling lamp with a metal frame with 7 or 10 lights, the suspension with 1, 5 7 or 13 globes, the floor lamp, two versions of the table lamp (lower without a glass globe, or higher with a glass globe) and the wall lamp, distinguished by the double direction of the light flux.
