Taijitu

Designer: Spazioameno

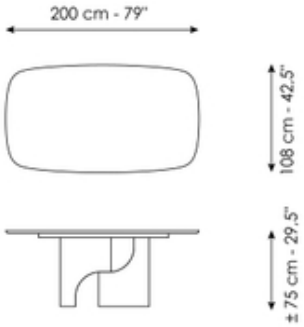

The Taijitu table tells a story about balance, coherence and the art of living. The sculptural metal base, composed of two elliptical section components with sinuous and balanced lines, draws inspiration from the Taijitu symbol, an ancient Chinese emblem of universal harmony and perfect balance between opposites. It is the same module, rotated 180 degrees, that composes the two elements of the central base, in a dynamic play of solids and voids, which is intended to be both an invitation to contemplation and the visual fulcrum of the entire environment. The masterly workmanship combined with the refined finish of the metal, available in different variants, enhances the geometries by modulating the reflected light in contrast with the material surface. Taijitu elevates distinctive and elegant design to a meditative experience, enriching contemporary dining with its unique presence and deep symbolic meaning.
