BONALDO

Vague

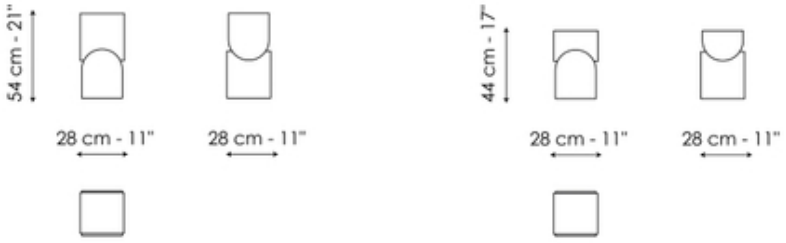

Designer: Roberto Paoli

The Vague designer modern magazine rack was born with a twin soul: its shape is actually produced twice, once full as a base and secondly empty as a container. With its skilfully combined linear geometry and its two composite materials, Vague is a sculptural element that enriches any living area, a sophisticated interplay of volumes that makes it much more than a simple magazine rack.
The metal upper section, which the concrete base raises both in a physical and figurative sense, is available in several colours and has a dual function: on the one hand it is a container for magazines or other objects and on the other it is a support surface which is ideal for placing near a sofa.
The union between the solidity and fullness of the concrete and the lightness and versatility of the folded metal makes Vague an interesting and sophisticated piece of furniture and it is available in two different heights

Data sheet

Vague high

Width: 28cm

Depth: 28cm

Height: 54cm

Vague low

Width: 28cm

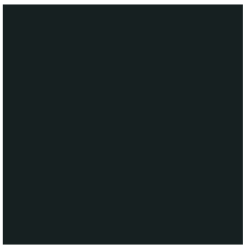

Depth: 28cm

Height: 44cm
